The fountains can be composed either of LED lights or LED rope lights only. They can also be composed of both. In addition, they can be embellished w/ PVC baubles. These strong structures are based on aluminium elements joined w/ the use of the TIG welding technology.

Fontány môžu byť vyrobené iba z LED žiaroviek a LED hadíc, alebo môžu kombinovať oba svetelné zdroje. Môžu byť navyše zdobené ozdobami z PVC. Samozrejme, v každom prípade sú postavené na silnej hliníkovej konštrukcii zváratej technológiou TIG.

We suggest 3D lamp post decorations from the section of goblets as the crowning effect.

na vrchol navrhujeme 3D lampiónové dekorácie zo série „kalichy“.

In the case of meteor shower rain lights we can observe the falling light effect. It can be the falling water effect in the case of fountain.

V prípade komét môžeme pozorovať tzv. "Efekt dopadajúceho svetla". V prípade fontány môže ísť o efekt padajúcej vody.

All-purpose decorations are designed for street lights, facades and interior decor. Individual pieces can be combined into larger motifs, i.e. over-the-street or large facade decorations. Snowflakes and similar smaller all-purpose motifs are available with or without the frame. The latter variant is better suited for hanging from Christmas trees.

Hviezdy a snehové vločky ako univerzálne dekorácie je možné použiť ako na stĺpy, tak aj na fasády. Dobré vyzerajú aj ako samostatné dekorácie v interiérovom dizajne. Môžeme ich tiež skombinovať a vytvoriť tak rozsiahle kompozície, napríklad nad ulicami alebo ako ozdoby na veľkých fasádach kancelárskych budov alebo nákupných centier. Môžu byť vyrobené na ráme alebo bez nich.
